The MILOS LED Trailer

is high-performance, portable display solution designed for maximum visibility and safety. Designed for easy transport and set-up, it features a powerful LED screen mounted on a robust trailer structure, making it ideal for outdoor events with large crowds.

Available in two versions – Light and Heavy Duty – the Trailer ensures a reliable, energy-efficient display while prioritising safety with stable operation and secure set-up, providing both durability and ease of use.

Screen

- **Size:** The screen measures 5.0 x 3.0 metres, offering a large display area for impactful visuals.
- **Height adjustable:** Features a motorised lifting system that allows adjustment up to a maximum height of 6.3 m, The Heavy Duty version offers automatic locking in any position.
- **Rotating screen:** : The screen can be rotated 340° around its vertical axis, ensuring optimal visibility and adaptability to challenging site conditions.

Simplified set-up and transport

- **User-friendly operation:** A portable control panel, operable wirelessly or via cable, makes screen unfolding and folding safe and efficient. The entire process can be managed by a single person.
- **Compact design:** The trailer's aerodynamic, compact folded shape ensures low ground clearance of just 1.6 m, contributing to stability during transport.
- **Quick setup:** The straightforward design minimises preparation time (up to 10 minutes), making it ideal for rapid deployments.

Wind resistance

- **Certified strength:** The Heavy Duty version is EN 13814-certified to withstand winds up to 64 km/h, with a safety margin allowing operation in conditions up to 76.8 km/h (Beaufort n. 8).
- **Adaptability:** The Light version is available for normal weather conditions (Beaufort n. 7), offering an economical option for less demanding environments.

Safety

- **Braking system:** The Heavy Duty version is automatically braked by SITEMA in any position. The Light version offers manual brakes in 2 fixed positions.
- **Emergency protocol:** An emergency hydraulic circuit allows system folding during power failures, minimising risks.
- **Enhanced safety standards:** Certified for public events, the LED Trailer meets stringent safety requirements.
